Plugging Proposal Received By: DAVE WERTZ Witness Type: PARTIAL
Date/Time Plugging Completed: 10/06/2004 4:05 PM KCC Agent: JEFF KLOCK

Actual Plugging Report:

This was a dual completed well with two strings of 2-7/8". Both strings of 2-7/8" were cemented in place to approximately 1300'. One string was a Layton sand gas producer and the other was a Stalnaker saltwater disposal. The 2-7/8" disposal string had 1-1/2" tubing ran inside. The 1-1/2" tubing string was pulled and the 2-7/8" strings were cemented to approximately 1300'. The 2-7/8" strings were shot above top of cement and pulled.

Tubing had not been tallied at the time of plugging. Ran in hole with 12 joints of 1-1/2" tubing to 360'. Pumped 105 sacks of 60/40 posmix with 4% gel to surface. Good cement returns.
