RE: Kerndt lease, Well 28-32, NW $\frac{1}{4}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$ 28-4-37W,
Cheyenne co., Kansas, API 15-023-20,197.

Per request, I'm supplying what knowledge we have concerning the source of the water used in drilling the captioned well. As I indicated to you on the phone, Snow Oil purchased the water from Miles Production Company (invoice enclosed). While none of the current employees at Snow were on the drill site, it is my belief that the water came from an irrigation well located to the east-southeast of the well location. This water well may be located in the west half of the west half of section 27-4-37W near the half section line.

If I can be of further assistance in this matter, let me know.

Sincerely,

Steven S. Swanson
Production Manager
