RE: Well plugging application, Ron's Oil Operations, Inc

Dear Sir,

We are unable to provide some of the information requested on the well plugging application, for the following reasons.

The Morris 1-22 was originally drilled by Oilexco, Inc during the 1982 period, we believe. At any rate longstring pipe was set, and it was logged 4-9-82. To our knowledge the lease was then abandoned, or at least never produced. Our company leased the premises in 1984, and produced the Oilexco well as well as an additional well which we drilled.

At this time we are preparing to plug both wells, and have submitted applications for such.

Sincerely,

Ron's Oil Operations, Inc  
Ronald Nickelson, Pres. <

Gentlemen:

This letter is to notify you that the Conservation Division is in receipt of your plugging proposal, form CP-1, for the above-captioned well.

Your CP-1 has been reviewed by the Conservation Division central office for completeness and to verify license numbers. The plugging proposal will now be forwarded to the district office listed below for review of your proposed method of plugging. Please contact the district office for approval of your proposed plugging method at least five (5) days before plugging the well, pursuant to K.A.R. 82-3-113(b). Failure to do so is punishable by an administrative penalty of up to \$1000.

It has recently come to my attention that the form CP-1 has been filed by operators other than the owner or operator of the well and without the consent of the owner or operator. The Conservation Division's review of form CP-1, either in the central or district office, does not include an inquiry into well ownership or the filing operator's legal right to plug the well.

**This notice in no way constitutes authorization to plug the above-captioned well by persons not having legal rights of ownership or interest in the well. This notice is void after ninety (90) days from the above date.**

Sincerely,

  
 David P. Williams  
 Production Supervisor
