Show depth and thickness of all water, oil and gas formations.

Table with columns: Oil, Gas or Water Records (Formation, Content) and Casing Record (Surface Conductor & Production) (From, To, Size, Put In, Pulled Out)

Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

Tubing was ran into the well to t.d. The well was gelled for bridging purposes. 60 sacks of cement were pumped through the tubing to t.d. The tubing was pulled to 500' and 20 sacks of cement was pumped to that depth. The tubing was pulled to 200' cement was pumped into the tubing until cement circulated from the surface casing at surface. The tubing was removed. Displacement was filled from surface
