Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

The pump truck was connected directly to the 2 7/8" casing. Cotton seed hulls were mixed with the first of the cement to be pumped. Cement was pumped into the 2 7/8" casing until the well would hold pressure. The well was then shut in at 1000 P.S.I. 40 sacks of cement were pumped into this well.
