Well Type: OIL

UIC Docket No:

Date/Time to Plug: 06/15/1997 9:00 AM

Plug Co. License No.: 32028

Plug Co. Name: CHITO'S WELL SERVICE, LLC

Phone: (785) 628-3422

Proposed This plugging report was never turned in by Roger Moses.

Plugging | Statements in parenthesis are his notes about the plugging.

Method: (The well has collapsed casing. The rig over the hole hit a bridge at 775'. Plan is to drill using a power swivel and open up the hole to Anhydrite.)

Plugging Proposal Received By: <u>HERB DEINES</u>

WitnessType: COMPLETE (100%)

Date/Time Plugging Completed: <u>06/15/1997 4:00 PM</u>

KCC Agent: ROGER MOSES

Actual Plugging Report:

Perfs:

(Rigged up over the hole and hit a bridge at 775'. Drilled with a mill to 1550' and could mill no further.)

Apparently the operator pulled the tubing to retrieve the mill. When they re-entered the hole, they again stacked out at 750'. This all took place around June 15, 1997. Apparently, there was some disagreement as to how this well was ultimately going to be plugged, i.e., plugging depth so the plugging was put on hold. According to a cement ticket from Allied Cementing Company #9309, dated 10/21/1997 the well was plugged through one inch tubing from a depth of 750' with 105 sxs common cement and squeezed with 1000# pressure with 30 sxs common cement. This confirms the unfinished report from Roger Moses. His notes state the following: (Plugged at 750' with 105 sacks of common cement. Tied onto 4 1/2" casing and squeezed with 30 sxs. There was 1000# of pressure on squeeze.)
