Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

A mixture of common cement (120 sks with 7.75 gallons of water per sk) was calculated to fill 1469' of 4.5" I.D. and 880' between 4.5" and 6.25" hole to G.L. No mud mixture was used. Cement was poured into hole up to G.L. Pipe was then cut off 50" below ground level. KCC on site at time of plugging.

Name of Plugging Contractor: LOBO PRODUCTION, INC. License #: 30282

Address: 6715 RD 22, GOODLAND, KS 67735

Name of Party Responsible for Plugging Fees: LOBO PRODUCTION, INC.
