Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

The coke breeze was removed by flushing with 2 3/8 drill stem, the  
cables and anodes were removed as they were exposed. The well was  
then grouted with neat cement from bottom up to 5ft covered with dirt.
