To Whom it may concern:

I told my wife to call the next intent in to District # 3, and she called in Lorenz # 27, when actually I had the Lorenz # 28 in hand in the field. It was drilled on Oct. 28, 2007 as you will see and was corrected with the Dist. # 3 office, when that well was dry and we received a plugging permit from John Almond. I am not sure that this was ever cleared up in Wichita. Lorenz # 27 was never drilled and shall not be drilled in the future. I am enclosing the drill log from # 28 to let you know what happened.

We are sorry this has taken so long to get this to you. We have had elderly parents who have fallen and broken hips, had pneumonia and, had to be transferred to nursing homes and my wife has been back logged with the paper work.

We appreciate your time and consideration in this matter.

Sincerely,

James D. Lorenz
