Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

Rig ran 2-3/8" tubing down hole for the wash job. After reaching T.D. the cement crew hooked on to the tubing and broke circulation w/ cement. Then the rig crew pulled all tubing and the cement crew topped off the well w/ cement and then hooked on to the casing and squeezed off the perforations. Then washed down tubing and rigged down and moved off location. 130 sxs of cement used plugged & abandoned
