County: Neosho

Date Well Completed: unknown

Plugging Commenced: 7/23/08

Plugging Completed: 7/23/08

Show depth and thickness of all water, oil and gas formations.

Oil, Gas or Water Records		Casing Record (Surface Conductor & Production)				
Formation	Content	From	To	Size	Put In	Pulled Out
		unknown	unknown	unknown	unknown	none
		670	surface	2-3/8"	670	670

Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

This is an old well bore that we were unaware. We do not have any information on this well

rigged up on location to begin drilling on old abandon well down to T.D. in preparation for plugging. Rig ran 2-3/8" tubing & drill bit down hole to drill. Rig crew ran down 545' & started drilling on what was believed to be a hedge post. After continuous drilling the crew finally reached 670' & couldn't make any more progress. Cement crew then tied on to tubing & started pumping 14# cement. After bringing cement to surface the rig crew pulled 11 lbs of tbg & the cement crew circulated cement to surface. After pulling the remaining tbg cement crew topped off well. Used 217 sxs cmt. Well is plugged
