Date of closure: 3-14-08

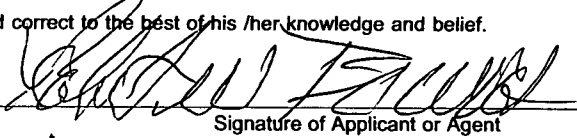

Was an artificial liner used? Yes No

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?
This was the original working pit for drilling of the Barnett 2-A well. The well was reworked in March 2008, then the pits were squeezed. I am now waiting for dry weather to dress the ground.

Abandonment procedure of pit: Rotary mud from well drilling will work as a sealant for reserve pit.
