Date of closure: 3/14/2008

Was an artificial liner used? Yes No

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?

Natural seal using Barite mud during drilling operations helped provide a seal to any significant water migration.

Abandonment procedure of pit:

Three times dozer visited site punching holes in the walls of the pits that were still moist and pushing them in when the pits were dry. Natural contour of the surface was restored to original condition per the landowners approval.

The undersigned hereby certifies that he / she is _____ President _____ for Gateway Resources, LLC (Co.), a duly authorized agent, that all information shown hereon is true and correct to the best of his /her knowledge and belief.
