RECEIVED
KANSAS CORPORATION COMMISSION
FEB 27 2009
CONSERVATION DIVISION
WICHITA, KS

Date of closure: 02/20/2009

Was an artificial liner used? Yes No

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?

The bottom of pit was lined and covered by fresh native and drilling mud product, including the vacuuming of any standing salt fluids during operations.

Abandonment procedure of pit:

Upon completion of drilling operations, all free standing fluids (fresh and/or salt) were vacuumed and pit allowed to natural dry. By request, the district #2 inspected pit and upon recommendation by staff, the pit was backfilled with the native soil produced from its original digging operation.

The undersigned hereby certifies that he / she is William Ash, Operations Director for BULLSEYE PETROLEUM (Co.), a duly authorized agent, that all information shown hereon is true and correct to the best of his /her knowledge and belief.
