Formation	Content	From	To	Size	Put In	Pulled Out
		SURFACE	8'	8'	IN-PLACE	NONE
		SURFACE	200'			
CATTLEMAN	OIL	200'	220'			

Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

Washed down 1" steel tubing to TD. Pumped 36 sacks of Portland (mixed 6 gallons of water per sack) and circulated cement to surface. Pulled out 1" cementing string and topped off with cement.

This was an old cable tool hole that had no surface casing. There were no records of the location by either old maps or terrain features that indicated the presence of a well. The ground became soft and the bore hole was discovered while searching for the leak.

Name of Plugging Contractor: Morris Energy License #: 33495

Address: PO Box 305 Weir, KS 66781

Name of Party Responsible for Plugging Fees: MORRIS ENERGY (Derek Morris)

State of Kansas County, Crawford, ss.
