<p>The foreman stated to me that when they went to transfer fluid from the reserve pit, that there was no free fluid present. Due to evaporation and absorption, there was no liquid to pump off, so no waste was transferred from this location to any other destination.</p> <p>We recognize the importance of groundwater protection, and wish to fully comply with all regulations, so we'll monitor this more closely and remind the foreman of this responsibility so it's not overlooked in the future.</p>
