KCC WICHITA

Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

The following cement plugs were set through drillpipe with their bases at the following depths:
(a.) 50 sx. at 1890' KB. (b.) 50 sx. at 1110' KB. (c.) 40 sx. at 300' KB. (d.) 20 sx. at 60' KB.
All cement was displaced with drilling mud. The top plug remained at the top of the surface pipe.
The top of the surface casing was cut off 4' below the surface and a steel plate was welded onto its surface. The surface above the wellbore was returned to its original countour.
