RECEIVED

Date of closure: Finished 11/24/2009

DEC 03 2009

Was an artificial liner used? Yes No

KCC WICHITA

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?
 Natural seal using Barite mud during drilling operations helped provide a seal to any significant water migration.

Abandonment procedure of pit:
 Dan's Dirt Works, dozer operator, worked on the site a number of times in between rains and muddy conditions beginning in September and ending in November 2009 by punching holes in the walls of the pits that were still wet, pushing them in when the pits were dry. Natural contour of the surface was restored to original conditions per the landowners approval.

The undersigned hereby certifies that he / she is President for Gateway Resources, LLC (Co.), a duly authorized agent, that all information shown hereon is true and correct to the best of his /her knowledge and belief.
