This application, which was received by the KCC on November 30, 2009 concerns approval to simultaneously produce from the following sources of supply through the same tubing string in the same wellbore:

| Source of Supply                   | Estimated Current Production |       |      | Perf Depth |

| Total Estimated Current Production | 7                            | 0     | 340  |            |

Based upon the depth of the Arbuckle formation perforations, total oil production shall not exceed 100 BOPD and total gas production shall not exceed 50% of the absolute open flow (AOF).

- **File form ACO-1 and a copy of any logs upon re-completion of the well to commingle.**
