Dear Mr. Noone:

This letter is to inform you that you have been granted an extension of time in which to close the drilling pits associated with the drilling of the LaBarge 1-20 well.

The original 365 days for closure expired March 23, 2008. This extension will expire February 21, 2009. We urge you to make every effort to close these pits within this time frame. In the event there is water standing in these pits, please dewater and dispose of fluids in an authorized disposal facility to expedite closure. Extension of this time frame automatically extends the time period for filing the Closure of Surface Pit form.

Failure to close the pit or request an additional extension prior to the expiration date may result in a fine in accordance with K.A.R. 82-3-602(a). An additional extension will only be granted for good cause and after K.C.C. field staff has made an inspection of the site. Should field staff discover that said pit has been closed before the date of extension request, an administrative penalty may be assessed to you through K.C.C. invoice.

If you have any questions in this regard, please do not hesitate to contact Jonelle Rains at (316) 337-6226.

Very sincerely yours,

Doug Louis

RE: Closure of Drilling pits; LaBarge 1-20
API: 15-163-23598-0000

Greetings,

I am writing in regards to the drilling pits on Baird Oil Company, LLC's LaBarge 1-20 well, in Rooks County. Since the completion of this well, I have filed several extensions for pit closure. The drilling fluids were removed and hauled to an authorized disposal last year. However, due to the location of the well, it has been nearly impossible for me to finish the necessary dirt work.

At this point, the pits are 95% closed, the only remaining work to be done is leveling off and smoothing out the location. We received another 4-5 inches of rain the past two weeks in this area and the location is flooded once again. I am asking for another extension at this time.

Thanks for your consideration in this matter.

Sincerely,

Andrew C. Noone
