RE: LEASE: STEVENS MORROW UNIT SMU 213  
LEGAL: 660'FSL-325'FWL 02-33S-30W  
COUNTY: MEADE  
API NO: 15119211870000

Dear Ms. Hernandez:

This letter is to inform you that you have been granted an extension of time in which to close the drilling pits associated with the drilling of the Stevens Morrow Unit SMU 213 well.

The original 365 days for closure expired October 27, 2008. This extension will expire February 27, 2009. We urge you to make every effort to close these pits within this time frame. In the event there is water standing in these pits, please dewater and dispose of fluids in an authorized disposal facility to expedite closure. Extension of this time frame automatically extends the time period for filing the Closure of Surface Pit form.

*Failure to close the pit or request an additional extension prior to the expiration date may result in a fine in accordance with K.A.R. 82-3-602(a). An additional extension will only be granted for good cause and after K.C.C. field staff has made an inspection of the site. Should field staff discover that said pit has been closed before the date of extension request, an administrative penalty may be assessed to you through K.C.C. invoice.*

If you have any questions in this regard, please do not hesitate to contact Jonelle Rains at (316) 337-6226.

Very sincerely yours,

  
Doug Louis  
Director

CONSERVATION DIVISION  
WICHITA, KS

Dear Ms. Rains,

Due to adverse weather conditions the area is still wet and we have been unable to successfully close the surface pond at the SMU 213 location. We have trenched the area in order to expedite the closure process, however time is not on our side and the dewatering is not complete and may not be closable until early spring, our Field Supervisor believes that this time is required to enable this closure to be completed.

We would be obliged if you could grant an extension to file this closure in view of these circumstances.

Sincerely,

Liliana Hernandez  
Senior Engineer
