Date of closure: 09/08/08

Was an artificial liner used? Yes No

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?

There was no procedure used to prevent this migration. We dug this pit to be present for overflow from plugging operation. The only fluid that went into the pit was a small amount of cement residue. The morning after the plugging operation the cellar area and constructed pit area were almost totally dry.

Abandonment procedure of pit:

The pit was allowed to dry and filled. Topsoil placed on top of the pit.
