Were: Clean well to TD and then pump full of cement thru cement string.

Plugging Proposal Received by: Alan M. Dunning

Plugging attended by Agent: All \_\_\_\_\_ Part \_\_\_\_\_ None XXXXXX  
TECHNICIAN

Operations Completed: Hour: \_\_\_\_\_ Day: 3 Month: 5 2010

Actual Plugging Report: A large portion of what appears to be a wooden bridge truss was removed from open hole. The wood truss is approx 4' long and rectangular (12" X 14"). Surface pipe was set and the well washed to 560' thru a 1" cement string but could go no deeper. The well was then pumped full of cement from btm to top thru this cement string. A total of 212 sacks of portland cement were used to plug well. The well was cut off below plow depth and the location restored.

Remarks: Control #20100039-001  
(If additional description is necessary, use BACK of this form.)

I did not observe this plugging.

Signed:

  
TECHNICIAN
