one-year exemption from open flow testing for the M.O.M 6-19 s that said well:
s that said well:
coalbed methane producer
coalbed methane producer
cled on plunger lift due to water
source of natural gas for injection into an oil reservoir undergoing ER
n vacuum at the present time; KCC approval Docket No
ot capable of producing at a daily rate in excess of 250 mcf/D
upply to the best of my ability any and all supporting documents deemed by Commission orroborate this claim for exemption from testing.
Signature: VP - Operations

## Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under OBSERVED SURFACE DATA. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption IS denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
