I hereby request a one-year exemption from open flow testing f	or the Rueb Farm 44-15					
gas well on the grounds that said well:						
(Check one)						
is a coalbed methane producer						
is cycled on plunger lift due to water						
is a source of natural gas for injection into an oi	reservoir undergoing ER					
is on vacuum at the present time; KCC approval	Docket No.					
is not capable of producing at a daily rate in ex	cess of 250 mcf/D					
I further agree to supply to the best of my ability any and all su	innorting documents deemed by Commission					
staff as necessary to corroborate this claim for exemption from te						
stall as hecessary to correspond the claim for exemption from the						
Date: 3/2/09						
Signature:	rife Barrelt					

Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under **OBSERVED SURFACE DATA**. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption **IS** denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
