$H_{\mathbf{k}}(x) = H_{\mathbf{k}}(x) + H_{\mathbf{k}}(x)$			

At some point during the succeeding calendar year, wellhead shut-in pressure shall be measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under "observed surface data." \*\*\*\* Shut-in pressure shall thereafter be reported yearly in the same manner.

> The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than thirty (30) days after the taking of the pressure reading. The form must be signed and dated on the front side as though it was a verified report of test results.
