Winfield	No Show	2730' - 2740'	7"	Plug Back - 2714'	None

RECEIVED
MAR 22 2011
KCC WICHITA

Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

Set 1st plug of 50 sacks class "C" and 200# Hulls at 2690'. Pull up hole to 1200' and set 50 sacks plug class "C" for second plug. Third plug pull up hole to 540' and set 50 sacks plug class "C". Good circulation. 4th plug set at 60' with 20 sack plug of class "C". Waited 24 hours and found cement fell 842' in 7" so put another 50 sacks plug class "C" and circulated good. Pump 10 sacks class "C" between surface and production to complete. Cut & weld cap about 6' below ground.
