Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

Ran 1" pipe into well, could not get below 520'. Received approval from KCC field man, Taylor Herman, to plug hole from 520' to surface. Consolidated Oil Well Services hooked pump truck to 1" pipe and filled hole to surface with 40 sacks of 50/50 poz mix cement with 6% gel. Pulled 1" out of hole. Hooked pump truck to casing and pressured 5 additional sacks of cement into hole and pressured up to 800 pounds.
