Date of closure: September 14, 2007

Was an artificial liner used? Yes No

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?

The bottom of pit was sealed with 3 to 4 inches of drilling mud gel. Liquids were vacuum and remaining solids were allowed to natural dry.

Abandonment procedure of pit:

Upon the fluids that were vacuum, no windows were ever cut or sides squeezed. The pits were allowed to natural dry, were inspected by a District #2 representative and authorization given to back fill with native soil originally of pit digging.

The undersigned hereby certifies that he / she is President for BULLSEYE PETROLEUM (Co.), a duly authorized agent, that all information shown hereon is true and correct to the best of his /her knowledge and belief.
