exempt and that correct of equip	t status under Rule K.A.R. 82- at the foregoing pressure info to the best of my knowledge pment installation and/or upo	ormation and statements contained on this application form are true and and belief based upon available production summaries and lease records in type of completion or upon use being made of the gas well herein named. Carr #1 Carr #1
	is a source of na is on vacuum at is not capable of urther agree to supply to the	hane producer nger lift due to water Itural gas for injection into an oil reservoir undergoing ER Ithe present time; KCC approval Docket No If producing at a daily rate in excess of 250 mcf/D best of my ability any and all supporting documents deemed by Commission his claim for exemption from testing.
Date:_	Jan 26, 2012	
		Signature: Title:owner-operator

Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under **OBSERVED SURFACE DATA**. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption **IS** denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
