Re: Workover Pit Application
Wedel Lease Well No. B-1
SE/4 29-21S-02W
McPherson County, Kansas

Dear Ms Wooten:

District staff has inspected the location and has determined that an unsealed condition will present a pollution threat to water resources.

District staff has recommended that the workover pit be lined. The plastic liner must have a minimum thickness of 10 mil. Integrity of the liner must be maintained at all times.

The free fluids in the workover pit should be removed as soon as practical after workover operations have ceased. The fluids should be taken to an authorized disposal well. Please call the District Office at (316) 630-4000 when the fluids have been removed. Please file form CDP-5 (August 2008), Exploration and Production Waste Transfer, within 30 days of fluid removal. Conservation division forms are available through our office and on the KCC web site: <http://kcc.ks.gov/conservation/forms/>

If you have any questions or concerns please feel free to contact the undersigned at the above address.

Sincerely,

A handwritten signature in cursive script that reads "Jonelle Rains".
