exempt status under Rule and that the foregoing p	e K.A.R. 82-3-304 on behalf of the operator MERIT ENERGY COMPANY ressure information and statements contained on this application form are true and
of equipment installation	knowledge and belief based upon available production summaries and lease records and/or upon type of completion or upon use being made of the gas well herein named. ne-year exemption from open flow testing for the GOING A-6
gas well on the grounds	
is cycles is a second is a second is on very list of very list on very list of ver	palbed methane producer led on plunger lift due to water purce of natural gas for injection into an oil reservoir undergoing ER vacuum at the present time; KCC approval Docket No capable of producing at a daily rate in excess of 250 mcf/D apply to the best of my ability any and all supporting documents deemed by Commission
	roborate this claim for exemption from testing.
Date: 12/15/2011	
	Signature: M. Chuy Patrice Title: REGULATORY ANALYST

Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under **OBSERVED SURFACE DATA**. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption IS denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
