I declare under penalty of perjury under the laws of the state of Kansas that I am authorized to request exempt status under Rule K.A.R. 82-3-304 on behalf of the operator Bramwell Petroleum, Inc. and that the foregoing pressure information and statements contained on this application form are true and correct to the best of my knowledge and belief based upon available production summaries and lease records of equipment installation and/or upon type of completion or upon use being made of the gas well herein named. I hereby request a one-year exemption from open flow testing for the Springer Hollow Farm #1 gas well on the grounds that said well:
(Check one) is a coalbed methane producer is cycled on plunger lift due to water is a source of natural gas for injection into an oil reservoir undergoing ER is on vacuum at the present time; KCC approval Docket No. is not capable of producing at a daily rate in excess of 250 mcf/D I further agree to supply to the best of my ability any and all supporting documents deemed by Commission staff as necessary to corroborate this claim for exemption from testing.
Date: 5-3-2012 Signature: Title: President

Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under OBSERVED SURFACE DATA. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption IS denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.

RE:

Gas Tests

Berry #1

Springer Hollow Farm #1

1-30-9W Kingman Co, KS

Dear Mr Hemmen:

The Berry #1 was shut in for a pump change on July 2, 2011 with a 31 hour shut-in pressure of 70 psi.

The Springer Hollow Farm #1 was shut in while the lead line was trenched in on October 20, 2011 and put back on line on October 21, 2011 with a 30 hour shut-in pressure of 750 psi.

Enclosed are separate G-2's reflecting the respective pressures for 2011. I assume that the previous G-2's I prepared for tests in April 2012 will suffice for the calendar year 2012. Please let me know if you need anything additional.

Sincerely,

Donald G Bramwell

President
