exempt status under Rule K.A.R. 82-3-304 on be and that the foregoing pressure information a correct to the best of my knowledge and belief	the laws of the state of Kansas that I am authorized to request behalf of the operator Chesapeake Operating, Inc. and statements contained on this application form are true and based upon available production summaries and lease records completion or upon use being made of the gas well herein named. In open flow testing for the Lemert 4-4
(Check one) is a coalbed methane producing is cycled on plunger lift due is a source of natural gas for is on vacuum at the presention is not capable of producing	e to water or injection into an oil reservoir undergoing ER t time; KCC approval Docket No g at a daily rate in excess of 250 mcf/D ability any and all supporting documents deemed by Commission
Date: June 8, 2012	nature: Mttha Sewhe
	Title: Aletha Dewbre, Regulatory Specialist

Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under OBSERVED SURFACE DATA. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption IS denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
