Date of closure: <u>08/23/2010</u> Was an artificial liner used? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If no, how were the sides and bottom sealed to prevent downward migration of the pit contents? Only small amount of cement and fresh water got into pit. Cement would have sealed fluid off. Vacuum truck emptied cellar as cement plugs were pumped down well. Abandonment procedure of pit: Pit was dry enough to backfill when the plugging was complete so the backhoe backfilled the pit and cellar after the surface pipe was cut off and capped by a welder.
