Eubank E #1, Sec. 15, T.34S, R. 33W, Seward County, Kansas  
API No. 15-175-22012-00-00**

Dear Ms. Carter:

Your "Application for Commingling" (ACO-4) for the above described well has been technically reviewed and approved by the Kansas Corporation Commission (KCC) per **K.A.R. 82-3-123a**. This application, which was received by the KCC on **February 27, 2006** concerns approval to simultaneously produce from the following two sources of supply through the same tubing string in the same wellbore: the **Morrow** and the **Chester** formations.

According to your application, the estimated current production from the **Morrow** source of supply is **450 MCFPD** and **2 BWPD**. The estimated current production from the **Chester** source of supply is **5 BOPD** and **1000 MCF** and **5 BWPD**. The total estimated current production from all sources of supply in the subject well is **1450 MCFPD** and **5 BOPD** and **5 BWPD**. Included in this application was operator verification that the offset operators had been formally notified of this application. No protest had been filed within the 15-day protest period.

Based upon the depth of the **Chester** formation perforations, total oil production shall not exceed **300BOPD** and total gas production shall not exceed **50%** of the absolute open flow of the well per state test.

Docket Number **CO 020605** has been assigned to this approved application. Please use this number for well completion reports (ACO-1) and other correspondence that may concern this approved commingling.

Sincerely,

David P. Williams
