RE: **API No. 15065-21910-00-01**
Frazey #1
SW SW NE, 18-6-21W
Graham County, Kansas

Dear Ms. Foss:

Your "Application for Commingling" (ACO-4) for the above described well has been technically reviewed and approved by the Kansas Corporation Commission (KCC) per **K.A.R. 82-3-123a**. This application, which was received by the KCC on **April 18, 2005**, concerns approval to simultaneously produce from the following **three** sources of supply through the same tubing string in the same wellbore: the **Toronto, Lansing-Kansas City and Conglomerate Sand**.

According to your application, the estimated current production from each source of supply is: **6.25 BOPD** and **1.25 BWPD** from the **Toronto**, **3.54 BOPD** and **29.40 BWPD** from the **Lansing-Kansas City**, and **3.63 BOPD** and **2.21 BWPD** from the **Conglomerate Sand**. The total estimated current production from all sources of supply in the subject well is **13.42 BOPD** and **32.86 BWPD**. Included in this application was operator verification that the offset operators had been formally notified of this application. No protest had been filed within the 15-day protest period.

Based upon the depth of the **Conglomerate Sand** formation perforations, total oil production shall not exceed **100 BOPD** and total gas production shall not exceed **50%** of open flow. Docket Number **CO 040506** has been assigned to this approved application. Please use this number for well completion reports (ACO-1) and other correspondence that may concern this approved commingling.

Sincerely,

Bob Petersen

Geologist/KCC Production
