RE: Commingling Application
Cooper I #1 N/2 N/2 NE Sec. 35, T.32S, R.33W, Seward County, Kansas
API No. 15-175-21963-00-01

Dear Ms. Carder:

Your "Application for Commingling" (ACO-4) for the above described well has been technically reviewed and approved by the Kansas Corporation Commission (KCC) per **K.A.R. 82-3-123a**. This application, which was received by the KCC on **May 16, 2005**, concerns approval to simultaneously produce from the following **two** sources of supply through the same tubing string in the same wellbore: the **Morrow**, and the **Chester** formations.

According to your application, the estimated current production from the **Morrow** source of supply is **12 BOPD, 19 MCFGPD, and 74 BWPD**. The estimated current production from the **Chester** source of supply is **140 MCFGPD and 2 BWPD**. The total estimated current production from all sources of supply in the subject well is **12 BOPD, 159 MCFGPD and 76 BWPD**. Included in this application was operator verification that the offset operators had been formally notified of this application. No protest had been filed within the 15-day protest period.

Based upon the depth of the **Chester** formation perforations, total oil production shall not exceed **200 BOPD** and total gas production shall not exceed **50%** of open flow. Docket Number **CO 050501** has been assigned to this approved application. Please use this number for well completion reports (ACO-1) and other correspondence that may concern this approved commingling.

Sincerely,

Robert Petersen
