RE: Approved Commingling CO 100503
Penka 17C #1, NE SW, Sec. 17, T.17S, R. 28W, Lane County, Kansas
API No. 15-101-21851-00-0002

Dear Mr. Neirnberger:

Your "Application for Commingling" (ACO-4) for the above described well has been technically reviewed and approved by the Kansas Corporation Commission (KCC) per **K.A.R. 82-3-123a**. This application, which was received by the KCC on **October 21, 2005** concerns approval to simultaneously produce from the following two sources of supply through the same tubing string in the same wellbore: the **Lansing-Kansas City** and the **Marmaton** formations.

According to your application, the estimated current production from the **Lansing-Kansas City** source of supply is **63 BOPD**. The estimated current production from the **Marmaton** source of supply is **30 MCFGPD** and **20 BWPD**. The total estimated current production from all sources of supply in the subject well is **93 BOPD** and **20 BWPD**. Included in this application was operator verification that the offset operators had been formally notified of this application. No protest had been filed within the 15-day protest period.

Based upon the depth of the **Marmaton** formation perforations, total oil production shall not exceed **200 BOPD** and total gas production shall not exceed **50%** of open flow.

Docket Number **CO 100503** has been assigned to this approved application. Please use this number for well completion reports (ACO-1) and other correspondence that may concern this approved commingling.

Sincerely,

Robert Petersen
Geologist/KCC Production
