Pratt has been in discussion with the state on this. Their instructions are as follows: Pratt will set a cast iron plug 50 feet above the top perf or the top of the open hole, depending how the well was completed. 2 sacks of cement will be added on top of the plug. Then they will pop the slips on teh casing and find a free point, shoot off the 4 1/2. Then while pulling casing they will stop at the hydryte and pump 15 sacks of gel and 50 sacks of cement. They will then come up to surface pipe and top off the well with cement. The atate will then provide plugging orders.

RE: Kansas Surface Owners Notification Act
Lease Name: Copeland SWD Well No.: 2
Location: 29-28-19W, NWNENW, Kiowa Cnty

Dear Victor L. and Joyce A. Copeland:

The 2009 Legislature passed *House Bill 2032*, known as the *Kansas Surface Owners Notice Act*. This Act requires the KCC to provide copies of drilling intents, operator transfers and well plugging applications to the surface owner if they are not provided by the lease operator. The *Operator of Record* has advised us that they have not provided you with a copy of the attached Well Plugging Application (CP-1) and Certification of Compliance with the Kansas Surface Owner Notification Act (KSONA-1) forms. Therefore, this letter and the attached forms shall serve as notice of the operator's action(s) in relation to the above-referenced well.

You do not need to respond to the KCC. Please contact the operator listed on these forms if you have any questions.

Very truly yours,

A handwritten signature in cursive script that reads "Steve Bond".
