1	my knowledge and belief based upon availabition and/or upon type of completion or upon us a one-year exemption from open flow testing ands that said well:  (e)  a coalbed methane producer cycled on plunger lift due to water a source of natural gas for injection into an oon vacuum at the present time; KCC approvanot capable of producing at a daily rate in exemption to the best of my ability any and all sucorroborate this claim for exemption from testing the signature:

## Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under **OBSERVED SURFACE DATA**. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption **IS** denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
