of equipment i	best of my knowledge and belief based upon available nstallation and/or upon type of completion or upon use l equest a one-year exemption from open flow testing for	being made of the gas well herein named
	e grounds that said well:	
[[[t further as	is a coalbed methane producer is cycled on plunger lift due to water is a source of natural gas for injection into an oil re is on vacuum at the present time; KCC approval D is not capable of producing at a daily rate in exce gree to supply to the best of my ability any and all supplications are to corroborate this claim for exemption from testing	Pocket Noess of 250 mcf/D porting documents deemed by Commiss

Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under **OBSERVED SURFACE DATA**. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption IS denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
