KCC WICHITA FEB 1 1 2014 RECEIVED

Checked by

,	formation and statements contained on this applic	,	
•	ge and belief based upon available production sun		
	pon type of completion or upon use being made of	the gas well herein named	
I hereby request a one-year exemption from open flow testing for the			Sparks #1 OWWO
as well on the grounds that said	well:		•
(Check one)			
	is a coalbed methane producer		
	is cycled on plunger lift due to water		
	is a source of natural gas for injection into ar	oll reservoir undergoing E	R
	is on vacuum at the present time; KCC appro	oval Docket No.	
X	is not capable of producing at a daily rate in	excess of 250 mcf/D	
l further agree to sup	ply to the best of my ability any and all supporting	documents deemed by the	Commission
	his claim for exemption from testing.		
an as necessary to controlorate		. 4 1	-0.

Instructions:

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under OBSERVED SURFACE DATA. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or under the claim of eligibility for exemption IS denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results.
