and that	status under Rule K.A.R. 82-3-304 on behalf of the operator MKJ Oil Co., LLC the foregoing pressure information and statements contained on this application form are true and the best of my knowledge and belief best during puriled a production summerica and lesso record
of equip	o the best of my knowledge and belief based upon available production summaries and lease record ment installation and/or upon type of completion or upon use being made of the gas well herein named by request a one-year exemption from open flow testing for the Maudie Reida#3
	on the grounds that said well:
	is a coalbed methane producer is cycled on plunger lift due to water is a source of natural gas for injection into an oil reservoir undergoing ER is on vacuum at the present time; KCC approval Docket No
Date: <u>0</u> 4	4/07/2014_
	Signature: <u>Senne Bugmon</u>

Instructions:

4

If a gas well meets one of the eligibility criteria set out in KCC regulation K.A.R. 82-3-304, the operator may complete the statement provided above in order to claim exempt status for the gas well.

At some point during the current calendar year, wellhead shut-in pressure shall have been measured after a minimum of 24 hours shut-in/buildup time and shall be reported on the front side of this form under **OBSERVED SURFACE DATA**. Shut-in pressure shall thereafter be reported yearly in the same manner for so long as the gas well continues to meet the eligibility criterion or until the claim of eligibility for exemption **IS** denied.

The G-2 form conveying the newest shut-in pressure reading shall be filed with the Wichita office no later than December 31 of the year for which it's intended to acquire exempt status for the subject well. The form must be signed and dated on the front side as though it was a verified report of annual test results. **KCC WICHITA**
