Dear Sir or Madam:

This letter is to inform you that you have been granted an extension of time in which to close the drilling pits associated with the Schneweis 11 well.

The original 365 days for closure expired on 05/20/2014. This extension will expire on 10/20/2014. We urge you to make every effort to close these pits within this time frame. In the event there is water standing in these pits, please dewater and dispose of fluids in an authorized disposal facility to expedite closure. Extension of this time frame automatically extends the time period for filing the closure of surface pit form.

*Failure to close the pit or request an additional extension prior to the expiration date shall result in a monetary penalty in accordance with K.A.R. 82-3-602(a). An additional pit extension may be renewed upon request, but no pit permit extension shall be extended beyond six months after the original deadline.*

Please complete the pit closure form (CDP-4) through Kolar (Kansas On-Line Automated Reporting) at <https://kolar.kgs.ku.edu>.

If you have any questions in this regard, please do not hesitate to contact Kathy Haynes at (316) 337-6243.

Sincerely,

Ryan A. Hoffman  
Director

Dear Kathy,

We would like to apply for an extension to get the following well into compliance. The pits are located in the middle of a wheat field and when they were almost dry and ready for closure, the farmer requested we wait until the crop was harvested to minimize damages and now with the recent rainfall, the pits are now holding water once again. We are hoping that a 6 month extension will allow enough time for the pits to dry and enable us to bring the well into compliance.
