REMARKS (Give review of work accomplished and any other comment of interest) Ripped up machine on September 20, 1948, ripped off 7"00 casing at 3030' and pulled casing above that point, leaving 770' of 7"00 liner in the hole.

On October 8, ran 2" tubing and rods and put well back on production. During the next 20 days the well ran to pump off water head; then during the next 10 days the well ran 24 hours per day and averaged 5 barrels of oil and 70 barrels of water daily.

(Use reverse side for continuation of remarks and for formation record.)
