Re: Munsch B-4
SW/4 Sec. 04-15S-18W
Ellis County, Kansas
15-051-26757-00-00

Dear Sir or Madam:

This letter is to inform you that you have been granted an extension of time in which to close the drilling pits associated with the Munsch B-4 well.

The original 365 days for closure expired on 12/03/2015. This extension will expire on 4/13/2016. We urge you to make every effort to close these pits within this time frame. In the event there is water standing in these pits, please dewater and dispose of fluids in an authorized disposal facility to expedite closure. Extension of this time frame automatically extends the time period for filing the closure of surface pit form, **but not the time period for filing the waste transfer form (CDP-5).**

Failure to close the pit or request an additional extension prior to the expiration date shall result in a monetary penalty in accordance with K.A.R. 82-3-602(a). An additional pit extension may be renewed upon request, but no pit permit extension shall be extended beyond six months after the original deadline.

Please complete the pit closure form (CDP-4) through Kolar (Kansas On-Line Automated Reporting) at <https://kolar.kgs.ku.edu>.

If you have any questions in this regard, please do not hesitate to contact Kathy Haynes at (316) 337-6243.

Sincerely,

Ryan A. Hoffman
Director

RE: Pit Closure Extension

Dear Sirs:

We would like to request an extension for a pit closure for the following pit:

API#15-051-26757-00-00
Munsch B-4
360' FSL & 1635' FWL
4-15S-18W, Ellis County, Kansas

Throughout the summer and fall, we have been closing as much of the pit that was dry enough to do such. However, the soil is of a high clay content and dries very slowly. We will need to wait until the pit is sufficiently dry before continuing to backfill.

Thank you.

Sincerely,

Tom Denning
