Well #28 appeared to be plugged.

Persons contacted:

Gary Fewins, Operator

Findings:

I arrived on the lease and met with Gary Fewins, operator. We went to well #28 location. Mr. Fewins used a backhoe and dug down to bedrock. He then cut the 4.5" casing off to verify cement. The well appears to be plugged. This well shows to only have been permitted and not drilled. Obviously the well was drilled and plugged. This well needs to have a plugged and abandoned status in RBDMS.
