To:

From: Bruce Rodie, KCC Hays office

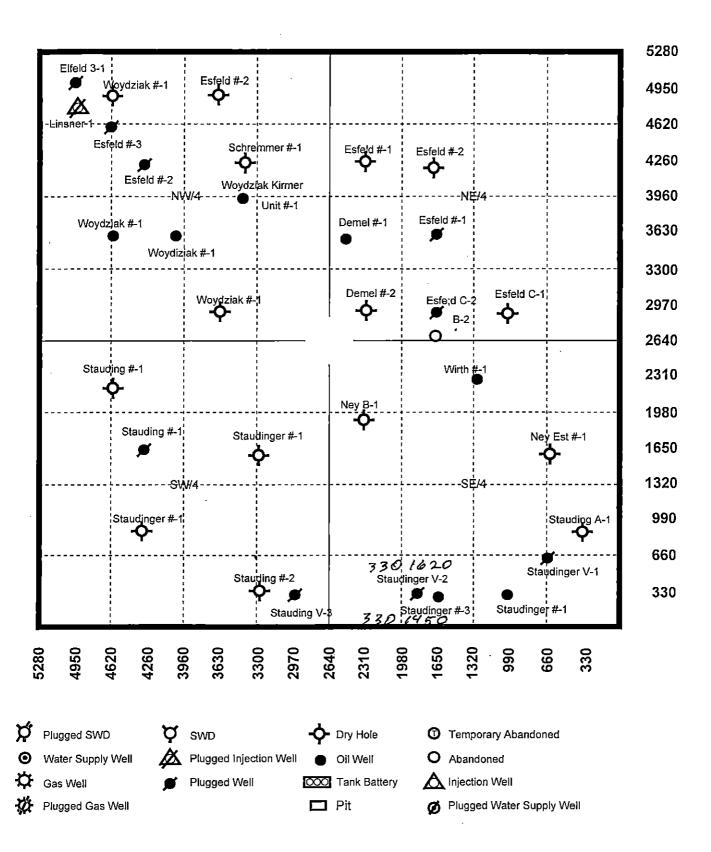

Regarding: RJM well inventory SE/4 7-16-11W

Date: January 25, 2016

The well Inventory for RJM CO. License 30458 Shows the Staudinger #2 API 15-009-22346 as a producing well. Two wells were drilled close the same spot location and RJM used the records for the wells from the company they bought the wells from. The Staudinger #2 was drilled in the SW/4 not the SE/4 and was DRY HOLE. The well drilled next to the producing well was the Staudinger V-2 and was plugged in 1951. The producing well is the Staudinger #3 and was drilled and completed in 1981.

RBDMS needs to be changed the show the Staudinger #2 API 15-009-22346-00 as a Plugged well. Copy of plugging report is attached.

The Staudinger #3 API 15-009-22358-00-00 needs to be changed to a producing well.

С
