

KCC OIL/GAS REGULATORY OFFICES

Inspection Date 11/28/2016 District: 3 Incident Number: 5589

- Checked: New Situation, Field Report; Unchecked: Lease Inspection, Response to Request, Complaint, Follow-up

Operator License No: 32851 API: 15-001-02688-00-00 Q3 NE Q2: SE Q1: SW
Operator Name: L & G Petroleum Operating, L SEC 3 TWP 24 RGE 18 RGEDIR E
Address: 1000 CAMINO DEL OESTE FSL: 1100
City: Bakersfield FEL: 3070
State Californi Zip Code: 93309 Lease: Cross Well No.: 8 P
Phone contact: (661) 832-7417 County: AL

Reason for Investigation:

Well #8P is past due for a Mechanical Integrity Test. Operator can't locate well. Well is on Docket #E-09017.

Problem:

No well present at the location given in RBDMS.

Persons contacted:

Randy Stanley, pumper, 620-365-9884

Findings:

Randy Stanley, pumper for L & G Petroleum, and I arrived at the Cross Lease and went to the area where well #8P was suppose to be located. I converted the given footages from RBDMS into Latitude and Longitude and added them to the GPS unit. We went to the location where well #8P was suppose to be located. No well was present above ground. Mr. Stanley stated that he never remembers a well located at this location and he had never tested it himself. We used a metal detector and located four (4) locations near where the well was suppose to be located. The operator dug around those four (4) areas and no well was located. At this point, no well was located at or near the location given in RBDMS.

Actions / Recommendation

Follow-up Required

Deadline Date:

I will refer my findings to Larry Marchant, UIC Coordinator District #3 office, and recommend that this well be removed from Docket #E-09017 and also have the well removed from the operators license since no well can be located.
